

DOJ

- Update EMMgr to database (Postgres)

Brian to resend email with database info

Report Generator

- BOX API Update to new version

- RT Notification of system errors to email addresses (both system)
- Separate logs loader vs Reporter
 - errors in own log
 - success in own log - reduced into syslog compatible text files
 - offer proposal
- More descriptive errors to users
 - option on Box for real time updates
 - progress indication
 - Use Box API to open new window/tab

→ Short term more info for user to call the help desk "INCIDENT NUMBER"
Add error identifier - full time stamp

- 5,000 file time out issue w/ Box API communication
 - does connection time out - auto reconnect 2 minutes
- List of Error locations for Help Desk
- Gate keeper system for loader
 - crashes once a week
 - use ps aux to check
 - name of jar file as command

```
ps aux | grep JAVA
ps -ef | grep java
```
- Ignore Report on "Report" folder
- Unable to load Reports to sub folders you don't have access - say if someone else shared their 'Reports' folder

New Report Folder Name Scheme

Reports (^{login}~~BoxID~~ email addn)

- BUG - not allows reports on subfolders in case
- Steve to check notes

Have weekly (total days)

multiple little releases
